The institute has BOSCH India Training center facility.

ABOUT THE DEPARTMENT:

Computer Science and Engineering and Information Technology department has well equipped laboratory. Department was established in 2007. The department offers UG course in CSE and IT and specialties include Industry Internship projects, highly qualified and experienced faculty members.

INTRODUCTION

Rails is a web application framework running on the Ruby programming language. Rails is a web application development framework written in the Ruby programming language. It is designed to make programming web applications easier by making assumptions about what every developer needs to get started. It allows you to write less code while accomplishing more than many other languages and frameworks. Experienced Rails developers also report that it makes web application development more fun.

COURSE CONTENT

1. Introduction Android Fundamentals and Architecture
2. Ruby Datatypes & Variables
3. OOP in Ruby
4. Rails Installation and Ruby gems and Database
5. Statement and Models

ELIGIBILITY:

Faculty members from Engineering Colleges, Polytechnic Institution and Industry person are eligible for participation in the program.

Please send your nomination in specified format to swati.patil@raisoni.net
